(WhatsApp, Email & Live Online)

Key Features

Construction Project Planning, Scheduling, and Site Control

Planning, scheduling, and site control best practices

Course completion certification upon success

Course Modules

1. Introduction to GUI and Software Scope

- Comprehensive understanding of the graphical user interface (GUI) for both Primavera P6 and MS Project.
- Overview of software functionalities and their application in construction projects.

2. Project Setup to International Standards

- Defining OBS (Organizational Breakdown Structure), EPS (Enterprise Project Structure), PBS (Product Breakdown Structure), and WBS (Work Breakdown Structure).
- Aligning activities and durations as per work contracts.

3. Project Calendar Management

- Creating and assigning project calendars tailored for Indian and Gulf construction projects.

4. Construction Logic Development

- Establishing relationships, lags, and leads.
- Manual and auto-scheduling configurations.
- Forward and backward scheduling techniques.

5. Site Monitoring and Updates

- Monitoring site progress and updating % complete.
- Utilizing notebooks in Primavera P6 for streamlined documentation and control.

6. Reporting and Resource Control

- Generating detailed Critical Path Method (CPM) reports and cash flow statements.
- Employing resource control methods and reporting techniques.
- Utilizing resource and activity usage profiles and spreadsheets.

7. Advanced Tracking and Analysis

- Creating logic reports for managerial control.
- Developing Look-Ahead Programs (LAP) for forecasting.
- Tracking layouts and network analysis with diverse parameters.

Course Deliverables

- In-depth case studies and real-world examples.
- Hands-on exercises with Primavera P6 and MS Project.
- Access to customizable templates and managerial tools.
- Certification of completion showcasing advanced project management proficiency.

Who Should Attend?

- Project managers, planners, and site engineers.
- Construction professionals handling large-scale projects.
- Individuals looking to enhance their skills in project planning and scheduling.

Duration 3 months + 15 Days Buffer

Training Mode:

Hybrid Learning: Access structured Online Learning System Modules (LSM) and live online sessions to resolve any queries in real-time.

Please click the link below to schedule a Zoom meeting to discuss the scope, delivery methodology, financials, support, and potential opportunities in detail. This will allow us to ensure a thorough understanding and alignment of expectations moving forward.

Progress is impossible without change, and those who cannot change their minds cannot change anything.

Upskilling and educational growth are not just about acquiring new knowledge but about a mindset shift that fosters adaptability and opens doors to new opportunities. Without this change, progress in one's career or personal development becomes impossible.
